

Utility Requirements Capture (Mock)

Capture date: 2026-02-20 | Source: Utility portal (mock)
EV Charging Site Project — Phase 6 Inputs (MOCK)

This PDF represents a mock capture of utility EV program requirements for adding EV load and documenting any load-management method. Replace with real portal captures and utility program documentation.

Required attachments (mock):

- Utility application form (EV load add).
- Load letter including existing + new EV load and EMS setpoint (if used).
- One-line diagram showing interconnection point.
- EVSE cut sheets and EMS technical brief (if applicable).
- Stamped permit drawings (sometimes requested; mock).

MOCK / EXAMPLE ONLY
