Photo Evidence — Acceptance + Verification Checklist (Mock)

This checklist documents what makes the photo evidence usable for engineering and plan review. Replace with real checkmarks/initials in a live project.

Acceptance criteria (mock):

- [ ] Nameplate photos readable at 100% zoom (ratings, voltage/phase, manufacturer/model).
- [ ] Breaker labeling photos include both context and close-ups.
- [ ] Photos map cleanly to schedule/header fields (no ambiguity).
- [ ] Filenames preserved (no post-capture renaming); timestamps plausible.
- [ ] Sensitive info handled appropriately (redacted copies; originals archived).
